Abstract

Learning supported by electronic technology is called Technology Based Learning. Technology-based learning constitutes learning via electronic technology, including the Internet, Intranets, Sattelite broadcasts audioand video conferencing, bulletin boards, chat rooms and webcasts, CD-ROM, ICD and PODCAST etc. Technology Based Learning also encompasses other related terms, such as online learning and web-based learning that only include learning that occurs via the internet, and computer-based learning that is restricted to learning through the use of computers. E-learning is synonymous with Techmology Based Learning.

Since Technology Based Learning has numerous advantages, it is transforming the learning and learning process as well. Some of the advantages are greater accessibility, anytime and anywhere delivery, readily scalable and accomodation of large learners. Due to its advantages and accessibility Technology Based Learning is growing rapidly in training and education in education and in business as well.....
